Resource type

☐

Generic

In certain systems for object-oriented programming such as the Common Lisp Object System[1] and Dylan, a generic function is an entity made up of all methods having the same name. Typically a generic function itself is an instance of a class that inherits both from function and standard-object.

☐

Installed

Lorem ipsum dolor sit amet, consectetur adipiscing elit. In facilisis ultrices ipsum nec convallis. Quisque quis metus vestibulum, lacinia quam nec, porttitor mauris. In ut faucibus leo. Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Donec imperdiet neque ipsum, a
